Valois,

We have comments from the CO, attached. We'll need to make the corrections and return along with additional documentation, including the project application. I'm not clear on where the QA crosswalk comes from. If we still need to do that we'll need to include it with the documentation. Would you like for me to address the comments, or do you want to take a look? Let me know how I can assist to help streamline our response and get this WA going.

The kick-off meeting is needed, so that comment just requires us to be direct and state something like "EPA to hold a kick-off meeting upon commencement of the WA."

I'll forward the IGCE separately, as there is a slight discrepancy on the hours. See comments.
